INTERNSHIP REPORT

Web Development

TRAINING CENTRE	Codec Technologies Pvt. Ltd.
PERIOD	08 July 2026 – 13 August 2026 (1 Month)
PROGRAMME	B.Tech in Computer Science and Engineering
INSTITUTION	NXTWAVE of Innovation in Advance Technology
PREPARED BY	**Damin Sahu**
ROLL NO.	25TEC2SE291
MENTOR	Dr. Anurag Shrivastava (Codec Technologies)

B.Tech in Computer Science and Engineering

Internship Overview

Company	Codec Technologies Pvt. Ltd., Chandivali IT Hub, Mumbai
Role	Web Developer Intern, July 2026 cohort (AICTE & ICAC approved)
Period	08 July 2026 – 13 August 2026, Pan India, Hybrid mode
Duration	One-month industrial internship program, as stated in official records
Training	AICTE & ICAC-approved industrial training and internship framework
Objectives	Practical web development, applying computer science concepts, and improving technical skills

About Codec Technologies

Organisation	Codec Technologies Pvt. Ltd., trading online at www.codectechnologies.in
Project Head	Dr. Anurag Shrivastava, Project Head & Program Manager
Location	Chandivali IT Hub, Mumbai, India (Global presence across 27+ countries)
Focus	IT & business consultancy, AICTE/ICAC approved industrial internship programs
Credentials	ISO 9001 certified organisation and Google for Education Partner
Supervision	Assigned project work and training tasks through the organisation's platform and email

Nature of Work Assigned

1 Planning & Structure

Defining the portfolio's purpose, content hierarchy, page sections, and navigation flow before coding. Establishing modular component organization and typed data models.

2 Frontend Design & Layout

Developing responsive UI components using semantic HTML5 and vanilla CSS design tokens, custom themes, dark mode palettes, and subtle micro-interactions.

3 Component Interactivity

Implementing client-side interactivity using modern JavaScript and TypeScript. Managing reactive theme switches, modal dialogs, and interactive UI states.

4 Version Control & Refinement

Maintaining clean version control with Git and GitHub. Conducting iterative code refinement, viewport cross-browser validation, and deploying production builds to Vercel.

INTERNSHIP REPORT

Internship Activity Record

1	3	1	1
Featured Project	**Core Technologies**	**GitHub Repository**	**Internship Role**
Personal Portfolio Website	HTML, CSS & JavaScript	Verified Source Code	Web Developer Intern

Completed: **"AICTE & ICAC Approved Industrial Training & Program Deliverables"**.

Focus: Frontend development, page structure, styling, code organization, and version control.

Major Project Undertaken

1. **Project Purpose:** A responsive personal portfolio website engineered to introduce the developer and present verified academic credentials, projects, and achievements.

2. **Structure & Content:** Features a hero introduction, education timeline, categorized technical skills, verified projects showcase, and an integrated resume hub.

3. **Frontend Technologies:** Developed with semantic HTML5, modular CSS styling, JavaScript/TypeScript, React component architecture, and the Vite build tool.

4. **Design & Usability:** Built with persistent light/dark themes, accent color switches, fluid responsive layouts, and accessible navigation.

5. **GitHub Repository:** Source code publicly maintained at https://github.com/daminsahu697-debug/portfolio (Production URL: damin-portfolio.vercel.app).

Skills Learned

1 Technical

HTML5, CSS3, JavaScript (ES6+), TypeScript, React modular components, Vite build pipeline, Git, GitHub repository workflows, and Vercel cloud deployment.

2 Communication

Clear technical explanation, structured project documentation, remote coordination with Dr. Anurag Shrivastava, and live interface demonstration.

3 Professional

Punctuality, meeting deliverables within an intensive 1-month schedule, systematic code hygiene, debugging layout issues, and time management.

Challenges Faced

1 Layout & Consistency

Maintaining a clean and cohesive visual hierarchy across diverse screen viewports. Solved through modular CSS tokens, flexible containers, and responsive breakpoint testing.

2 Debugging & Refinement

Identifying and correcting UI edge cases such as modal overlay scrolling and theme persistence across browser reloads through rigorous console inspection.

3 Time & Task Management

Organizing project milestones within the one-month hybrid internship window while balancing academic coursework through structured development sprints.

Outcomes & Recommendations

1 Outcomes

- Understood the end-to-end web engineering lifecycle from structural design to production deployment.
- Established practical connections between computer science principles and client-side frontend implementation.
- Mastered industry-standard Git version control workflows, branch tracking, and clean repository hygiene.
- Developed heightened awareness of UI/UX accessibility, visual hierarchy, and cross-device consistency.

2 Recommendations

- Provide structured onboarding documentation and coding style guides for incoming web interns.
- Introduce regular live peer code review sessions and architectural mentoring check-ins.
- Offer expanded practical exercises in automated frontend testing and continuous integration (CI/CD).
- Provide broader exposure to full-stack backend integrations and emerging web standards.

Conclusion

1. The internship successfully translated academic computer science foundations into practical frontend web engineering practices.
2. The Personal Portfolio Website served as the primary project for demonstrating responsive design, modular architecture, and professional presentation.
3. Successfully completed the AICTE & ICAC approved industrial training program on 13 August 2026 under the mentorship of Codec Technologies Pvt. Ltd.

THANK YOU

Sincere thanks to Dr. Anurag Shrivastava (Codec Technologies), Ms. Aparajita Negi (HOD, NIAT), and Department of Computer Science & Engineering, NXTWAVE of Innovation in Advance Technology.
